

Blizzard

Objective:

To reinforce addition skills

Materials:

6 white snowball markers for each player (mini-marshmallows)

a pair of dice for each group of 3 to 5 players

a paper plate for each group of 3 to 5 players

Object of the Game:

To find sums 2-12 or to find the products of 2-6

To accumulate snowballs by rolling sums of 6, 8, 10, and 12 or products 12, 18, 24, 36

Winner:

The player with the most snowballs at the end of a given period of time or the last player left with snowballs.

Directions:

1. Each player places one of his or her six snowballs on the paper plate in the center of the playing surface. This will be called the snowbank.
2. Players take turns rolling the pair of dice. Players must identify the sum or product of the dice and consult the Weather Forecast listed below to know how many snowballs to put in or take out of the snowbank.
3. Each time the snowbank is empty, each player must put one snowball into the snowbank before play resumes.
4. A player is considered “melted”, or out, when all of his or her snowballs are gone.
5. Play continues until a specified amount of time has passed, or until only one player with snowballs remains.
